

Environmental Health Specialist Advanced Training on On-site Sewage Management Systems

Tuesday, April 03, 2018 | 8:30 a.m. – 5 p.m. | Jekyll Island Convention Center

COURSE DESCRIPTION AND LEARNING OBJECTIVES

The purpose of this eight-hour training class is to increase the knowledge of those county board of health employees whose job responsibilities include the evaluation, inspection and permitting of onsite sewage management systems for residential and commercial establishments. This class will satisfy the eight hours of continuing education requirement for their bi-annual GA DPH Certification renewal.

By the end of the On-site Sewage Management Systems training, participants will be able to:

- Better understand the processes involved in performing subdivision plan reviews
- Evaluate which alternative on-site sewage management systems are better suited for marginal soils
- Troubleshoot failing on-site sewage management systems and determine the appropriate repair option
- Properly record the causes for on-site system failures

Instructors: Thomas Vanderboom, REHS/RS; Adam Stell, B.S.-Georgia Department of Public Health; Environmental Health Section

Target Audience: Environmental Health Specialists, Soil Classifiers

REGISTRATION AND LOGISTICS

- **DATE/TIME:** Tuesday, April 03, 2018 | 8:30 a.m.-5 p.m.
- **LOCATION:** Jekyll Island Convention Center
75 Beachview Dr N, Jekyll Island, GA 31527

CONTINUING EDUCATION UNITS

Environmental Health Specialists engaged in land use activities are required to have 8 Continuing Education Unit hours every two years to maintain their Inspector Certification. Eight hours of CEU credit will be awarded to Environmental Health Specialists that attend.

The workshop is free and limited to the first 50 EHS with confirmed (paid) registration to the GPHA annual conference and meeting. (A minimum of 15 registrations by February 15 is required for the course to be held).
